

LCRW10 High surge voltage 1.8A SCR

$I_{T(AV)}$	1 A
V_{DRM}/V_{RRM}	800 V
I_{GT}	200 μ A
T_J	-40°C to +110°C

Features

- On-state rms current, 1.8A
- Repetitive peak off-state voltage, 800V
- Non-repetitive direct surge peak off-state voltage, 1250V
- Non-repetitive reverse surge peak off-state voltage, 900V
- Triggering gate current, 100 μ A
- High off-state immunity: 200V/ μ s

Applications

- GFCI (Ground Fault Circuit Interrupter)
- AFCI (Arc Fault Circuit Interrupter)
- RCD (Residual Current Device)
- RCBO (Residual Current circuit Breaker with Overload protection)
- AFDD (Arc Fault Detection Device)

Description

Thanks to highly sensitive triggering levels, the LCRW10 series is suitable for circuit breaker applications where the available gate current is limited.

The 1250V direct surge voltage capability of the LCRW10 enables high robustness of the whole circuit breaker. The low leakage current of the LCRW10 reduces power consumption over the entire lifetime of the circuit breaker. The high off-state immunity (200V/ μ s) insures the non tripping of the breaker in case of electrical fast transient (EFT) on the mains.

The LCRW10 is available in through-hole TO-92 package with GAK and KGA pinout and in SMBflat-3L package.
